Market Leader in
Salt Water Technology

- Filters & Pumps • Pool Covers • Pool Service •
- pH-Control Systems • Pool Heating •

HEALTHY

ECO-matic treated poolwater does not contain excess chlorine. It is **biologically natural** pool care and definitely the **healthier** way to swim. Only a small amount of sea salt (0,3%) is added to your poolwater.

By comparison:

- the human eye 0,9%
- sea water 3,5%

• YOU'LL LOVE THE FEELING •

Swimming in low salinity is so kind to your skin, eyes and hair. It makes the water feel like pure silk. *ECO-matic* also enriches your pool water with pure oxygen making it sparkling and refreshing.

• MEDICALLY RECOMMENDED •

Stinging eyes, skin irritation and the pungent smell of chlorine are history. That is why Doctors recommend *ECO-matic* for chlorine related allergies. Especially for **children** and dermatologically sensitive people.

ECONOMICAL

ECO-matic is healthy, practical and ecologically sensible. Due to the lack of excess chlorine in the pool water, backwashing your filter will no longer contaminate the environment.

Conventional pool treatment requires large quantities of chlorine and other chemicals. This is not only unhealthy and time-consuming, but expensive as well.

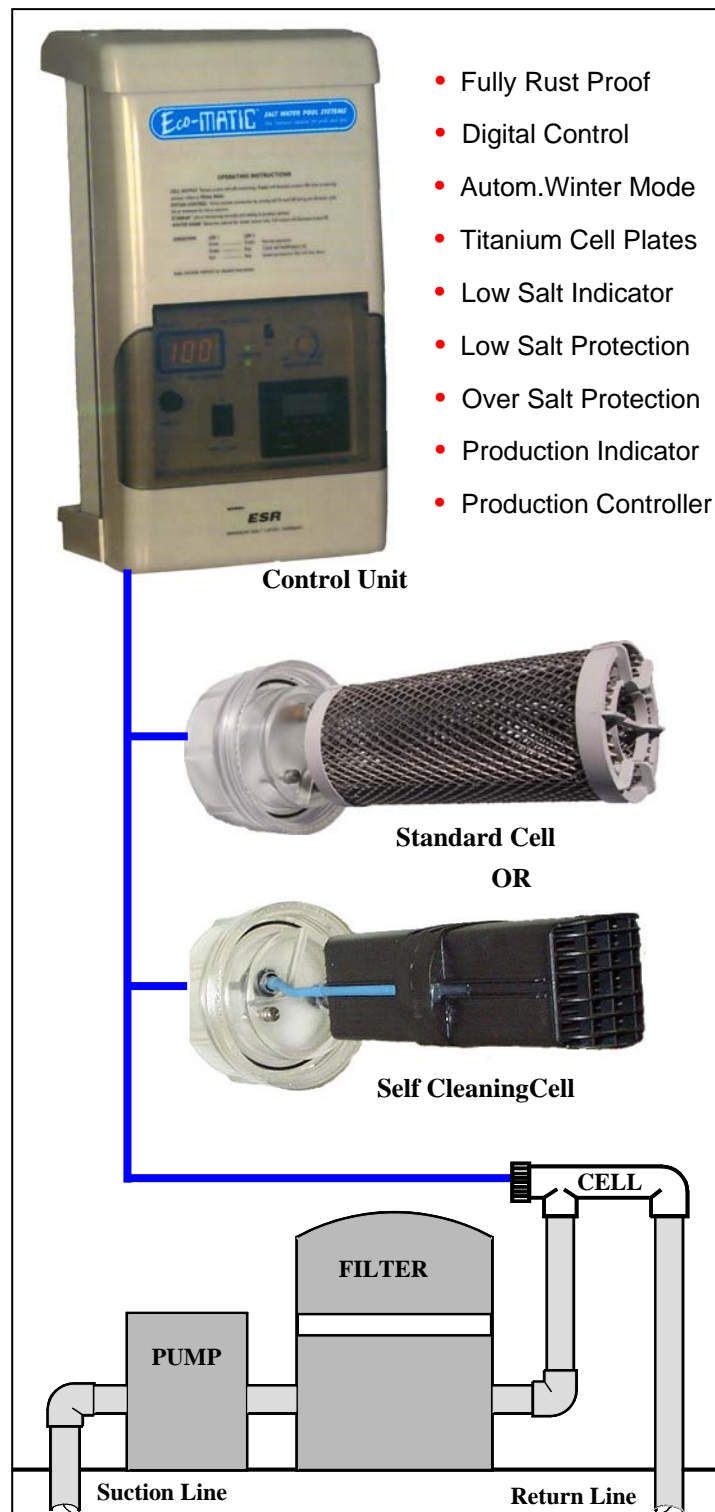

• NO ADDITIONAL CHLORINE •

ECO-matic owners only need to replace the salt from time to time, which is lost through backwashing the filter or occasional splashing.– Salt is **cheap** and **very little** is needed.

EXAMPLE: An average family-pool of appr. 70.000 Ltr. (10 x 5 m) requires appr. 50kg of Salt every 4-6 months. Including pH - correction this amounts to less than €25,- per year.

• ECO-matic SAVES YOU MONEY •

Due to advanced technology and the use of state of the art Titanium electrodes, *ECO-matic* is able to offer an exceptionally long cell life of up to 5 years, depending on the water quality. Not surprising that *ECO-matic* is the most sold Salt Water Pool System world wide.

PRACTICAL

ECO-matic can be fitted to new or existing pools.

• NO CHANGE OF WATER NECESSARY •

To install *ECO-matic* is simple and quick.

- After 2 hours your pool can be enjoyed again.
- The entire installation is located in the pump / filter room, leaving the pool area clear and uncluttered.

The *ECO-matic* ESC-System requires no special maintenance.

- The ESC- System runs entirely by itself.
- Light and sound signals warn in case of over- or undersalting.
- In conjunction with the optional pH-control system even the pH of your pool water remains automatically constant and correct.

The ESR-Standard System must be cleaned occasionally. This is a very simple operation and takes appr. 5 minutes.

• IT'S HASSLE-FREE •

ECO-matic works fully automatic. Even when you are away from home.

SERVICE

Salt water is our business. Trained in Australia, the home of Salt Water Pool Technology, we have been advising and looking after our customers since 1995. Over two thousand *ECO-matic* systems are currently running in the Algarve – to the great enjoyment of their owners. That is security!

• PRODUCT & SERVICE EXCELLENCE •

The best product is only as good as its local representatives. ECO-MATIC's long and proven history of performance and reliability means, that you can convert your pool to the 'natural solution' with confidence.

• DEDICATION & EXPERIENCE •

We are proud of our product quality and after-sales service and remain dedicated to providing every customer with a truly magnificent product, the best service possible – and a lifetime of chemical free swimming.
